

Renin-angiotensin-system-acting agents - all results

Treatment	Number of studies	Demonstrated or suggested results	Inconclusive results	Uncertain results	Safety results
-----------	-------------------	-----------------------------------	----------------------	-------------------	----------------

discontinuation of ACEI/ARB	1 study ¹		inconclusive results for : deaths ; mechanical ventilation		
-----------------------------	----------------------	--	--	--	--

Uncertain results are statistically significant results but obtain in trial with high risk of bias.
Demonstrated results are significant results obtained on the primary endpoint of a trial at low risk of bias or with some concerns.
